PROJECTS

HR Analytics Dashboard

The HR Analytics dashboard project using tableau is designed to provide insights into key metrics and trends related to human resource management in an organization. The dashboard include several key visualizations that provide a comprehensive overview of HR-related metrics, including employee turnover rate, headcount, and employee engagement levels. The dashboard also include metrics related to recruitment, including time-to-fill and cost-per-hire.

Store Sales Dashboard

A sales Excel dashboard overview provides a comprehensive visual representation of key sales metrics and performance indicators. It allows sales teams to quickly and easily monitor their progress towards meeting their targets and identify areas for improvement. With features like interactive charts, graphs, and tables, a sales Excel dashboard provides a dynamic and customizable tool for analyzing sales data in real-time

Hotel Booking Analysis

In recent years City Hotels and Resort Hotels have seen high cancellation rate. Each hotel is now dealing with a number of issues as a result, including fewer revenues and less than ideal hotel room use. Consequently, lowering cancellation rates is both hotels primary goal in order to increase their efficiency in generating revenue, and for us to offer through business advice to address this problem.
